

Tate Security Industrial Doors,
Roller Shutters and Barriers

Industrial Doors, Roller Shutters and Barriers

Security Services

Secure your premises with high-quality, compliant roller shutters from Tate Security. From installation to servicing and emergency repairs, we provide a full suite of services to protect your assets and ensure compliance with UK legal requirements.

Protecting your premises after hours is crucial, and security shutters remain one of the most effective ways to safeguard your business. We offer comprehensive security solutions and maintenance services, supplying and installing a wide range of security shutters suitable for retail, commercial, and industrial properties.

We understand that every property has unique vulnerabilities, which is why we provide a full survey and installation service to ensure your shutters are correctly fitted and optimised for your environment. We also offer shutters with additional features such as partial vision panels, electric operation, and colour matching to blend seamlessly with your premises.

Our shutters can be tailored to fit any entry point, including doors, windows, and loading bays, ensuring your property remains secure while maintaining daily operational efficiency. With options including fire-rated, weather-resistant, powered, and manual systems, you can choose a solution that aligns with your property's specific needs and risk profile.

Our team is committed to delivering long-lasting protection, ensuring your shutters remain resistant to impacts, abrasions, and environmental wear. Through our ongoing maintenance services, we help you keep your security shutters operating smoothly, reducing the risk of faults and unplanned downtime.

Industrial Doors, Roller Shutters and Barriers

Security Services

Roller Shutter Servicing

Regular servicing of roller shutters is crucial for compliance with UK workplace safety laws, extending the lifespan of your shutters and preventing downtime.

Our Standards:

- DHF & ISO 9001-aligned procedures
- Full health and safety check
- Force testing and lubrication
- Certification for compliance records

Benefits of Servicing:

- Prevents breakdowns and costly repairs
- Ensures legal compliance
- Reduces insurance premiums
- Prolongs shutter lifespan

Area's We Cover

Tate Security provides roller shutter installation, servicing, and repairs nationwide across the UK, including:

- Greater Manchester
- Merseyside
- Yorkshire
- West Midlands
- North Wales
- London & the South East

We also undertake larger projects across the UK for multi-site commercial and Industrial Businesses.

Industrial Door Repairs

Maintaining and repairing roller shutters is not only essential for security but also a legal requirement under UK Health & Safety law to ensure equipment is safe for use under the Provision and Use of Work Equipment Regulations (PUWER).

We Provide:

- Emergency 24/7 repair services
- Rapid response to reduce downtime
- Full safety compliance checks
- Replacement of worn parts

Why Choose Tate Security's Roller Shutters?

Tate Security provides roller shutter installation, servicing, and repairs nationwide across the UK, including:

- Bespoke Solutions – Tailored to your precise needs, dimensions, and operational requirements. Merseyside
- Fully Certified – CE marked, UKCA, fire-rated, ATEX options, tested to EN 13241.
- Expert Installation Nationwide – Fast turnaround with minimal disruption.
- Emergency Repair & Maintenance – 24/7 support to protect your business.
- System Integration – Works with alarms, automation, and security systems seamlessly.

Tate Security Roller Shutter Product Range

Security Services

Secure your premises with bespoke, certified roller shutters designed for industrial, commercial, retail, and specialist environments, ensuring maximum security, compliance, and operational efficiency.

DD11 - Industrial Roller Shutter (Direct-Drive, Power Operated)

A robust solution for commercial and industrial sites, ideal for high-usage areas requiring durability and security.

- Curtain: 76 mm solid steel laths, with optional perforated, punched, or brick-bond grille styles.
- Drive: Safedrive® motor with anti-fall brake and manual hand-chain override.
- Tested to EN 13241:2003+A2:2016.
- High wind resistance (Class 5 with 100 mm guides).
- Wide RAL/BS colour options, galvanised as standard.
- Manufactured in-house for strict quality control.

FM11 - Industrial Roller Shutter (Flange-Mounted Motor, Power Operated)

Designed for sites with minimal side room, providing robust security with a compact footprint.

- Curtain: 76 mm solid laths with perforated, punched, or grille options.
- Drive: GfA Ranger flange-mounted motor with chain transmission.
- Manual hand-chain override for emergencies.
- EN 13241 certified.
- Various sealing, locking, and finish options.

CD3 - Manual Chain-Driven Industrial Roller Shutter

Ideal where electric power is unavailable, providing reliable security for openings up to 6000 mm × 5000 mm.

- Curtain: 76 mm solid laths, perforated or punched options available.
- Operated manually via chain with counterbalance spring for smooth operation.
- CE/UKCA certified.
- Wide finish options, including plastisol or powder-coated colours.

TS19 - Tubular-Motor Security Roller Shutter

Compact and discreet, perfect for retail and commercial facades where aesthetics and security must align.

- Curtain: 76 mm solid steel laths; optional perforated, punched, or tube-and-link.
- Powered by 240 V tubular motor with hand-crank override and safety brake.
- Controlled via key-switch, push-buttons, or remote.

DS33 - Insulated Power-Operated Roller Shutter

Built for energy efficiency, noise reduction, and security.

- Curtain: Double-skinned steel laths filled with polyurethane foam with anti-scratch PVC coating.
- Powered by Safedrive® motor with built-in safety features.
- EN 13241 certified.
- Optional vision lath windows for visibility.

DS35 - “The Arctic Hare” Insulated High-Speed Roller Shutter

Fast-operating insulated shutters for high-traffic industrial sites, reducing air exchange while maintaining security and thermal insulation.

- Curtain: Double-skin, foam-filled with PVC coating.
- Safedrive® Fi frequency-inverter motor for soft start/stop and fast cycles.
- Emergency manual override.
- EN 13241 certified.

FR37 - “The Phoenix” 4-Hour Fire-Rated Roller Shutter

Designed for fire containment, protecting lives and assets while ensuring compliance.

- Curtain: 2" flat laths in a compact roll design to save headroom.
- Motor: 240 V tubular with fire-alarm activation and UPS backup for automatic closing during power loss.
- Tested per BS EN 13241-1 & EN 16034.

ATEX3 - ATEX-Certified Industrial Roller Shutter

Essential for hazardous environments (paint, dust, chemical facilities).

- Complies with ATEX Directive 94/9/EC for explosive atmospheres.
- CE marked with Declaration of Performance.
- Custom-built for specific hazardous zones.

WD25 - Wicket-Door Integrated Roller Shutters (Power Operated)

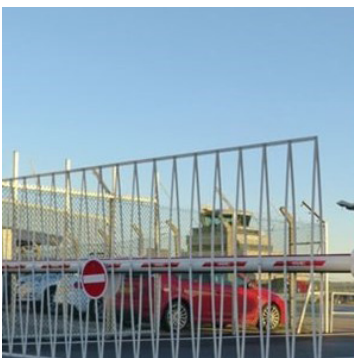

Combining pedestrian access with high-security protection for large apertures (up to 10 m × 6 m).

- Integrated wicket (access door) within the shutter curtain.
- 25 mm double-skin laths with nylon endlocks and weather sealing.
- Available with direct-drive or flange-mounted motors, plus counterbalance spring options.
- Optional vision panels, induction loops, remote controls, and wind-loading seals.

Industrial Doors, Roller Shutters and Barriers

B680 Automatic Barrier

A next-generation 24V automatic barrier that combines speed, durability, and style. Capable of handling beams up to 8.3m, it delivers over 2 million maintenance-free cycles with ultra-fast opening in as little as 1.5 seconds. Its sleek modular design with interchangeable cases (4 colours or stainless steel) ensures it fits perfectly in any environment. Packed with smart features like obstacle detection, integrated loop detectors, LED lighting, and adjustable speed, this barrier offers flexibility, safety, and long-term reliability — all in a single model that's easy to install and retrofit.

Accessories

Find a complete list of accessories and parts at tate-security.co.uk

Access Control Options

Choose one of our access control options such as the K44 Keypad or the Paxton Keycard/Keyfobs

K44: The keypad has backlit buttons, a 2 relay output, programming via keyboard. Lock open time of 1-99 seconds two door interlock facility.

Paxton: Once programmed into the software, the token is ready for use. Simply present the token to a reader, the access permissions will be instantly looked up and access granted or denied as appropriate.

XP20 Photocells

The new XP 20 D adjustable photocells comprise a transmitter and a modulated infra-red receiver with a range of up to 20 m. The XP20 W has 4 channels to prevent cross talk, ideal for sites with photocells in close proximity.

SUPERIOR PROTECTION

Mould seal on the casing, so there is no risk of it being removed or fitted incorrectly, thereby ensuring the IP54 protection class.

XP30 Photocells

A range of 30 metres, and a depth of 21 millimetres. XP30 photocells are extremely compact. A 55 × 78 mm surface with such a limited projection as to keep them safe from passing vehicles.

Compact, solid, slim: XP30 models blend into all architectural contexts, from the most classic to the most minimal. XP30 stainless steel models are all-metal, covered in satin-finished steel, the only ones available on the market.

X-Guard sensor for barriers

A smart horizontal safety sensor that is designed for maximum reliability, it detects all types of vehicles, including electric and composite models, and even tracks their approach or departure to avoid false barrier raises. With the ability to ignore pedestrians, a wide 9.9m x 9.9m detection field, and an option for a discreet look by disabling LED indicators, this sensor delivers precision, safety, and convenience in one compact solution.

100%

Guaranteed Security

We continue to innovate service provisions to our clients and work in partnership to deliver new processes and solutions within our contracts which bring estate efficiencies and serve to bolster the overall objective of protecting our client's people, assets and reputations.
